- Allend is an amazing TA. He always knew what he was talking about and was very knowledgeable in the course. I went to most of his TA office hours and found them to be a great supplement to my education. I would highly recommend Allend for this class.
- Allend is by far one of the best TA's i have had at UCSD. He really cares about the students in the class and always goes the extra step to ensure they get the help they need. His explanations were clear and extremely helpful.

I dont think I could have gotten through this course without him.

Thank you thank you thank you allend!!!

- Allend is excellent! He explained the concepts very well and Allend shared his industrial experience with the class.
- Allend was extremely helpful in clearing up conceptual confusion (which I had a lot of in the course). It is evident he knows the material well and does not make you feel inferior for asking a question. Allend has been fast in responding and always respectful.
- Allend was very very helpful in this course, which was much needed as myself and many of my peers were very stressed out about this course. He was a very effective and helpful liaison between the students and professor. Very understanding, willing to help wherever he can, and will often go over-time in office hours to help students. One of the best TAs I have had at UCSD.
- Best SE TA I've had! Allend led super helpful and informative office hours, guiding students with tips and tricks to succeed on homework and exams. Very approachable and understanding of our concerns. Always timely and very friendly. Allend was there for us for SE 151A as well as advice for future classes and careers. Would definitely recommend him to my friends! Allend truly went above and beyond and it's a shame we don't get to interact in person.
- GOAT for the Matlab code and RISA 2D
